Percentage: 88.5%

Projects

Video-chat web app | React Js, Express Js, WebRTC

- The site allows user to make and receive a call. It's fully peer to peer network.
- Made with the help of WebRTC and its API service which allows accessing media devices while making a call. It also makes the calls restrict to peer to peer while avoiding a mediator server

Virtual Painter | Python, OpenCV |

4

- Paint app made with Python. Used different features of OpenCV. Use of MediaPipe for handtracking. Can draw pictures while moving our hand/fingers in free air.
-

Technical Skills

Languages: C, C++

Courses: Data Structures and Algorithm, Object Oriented Programming,

Other Experience

Social Internship at Ideal Abhijaan.

Summer Intern

- A case study on common problems faced by the residents of Napam and Duliagaon
